August 2012

Florida International University, 3.70 / 4.00

Two-year tutor

## Available Works

---

### **Fragmented Philosophy: 300 Thoughts for the Third Millennium**

Philosophical essay full of illusions, experiences, questions, and reflections. It is a text that holds more questions than answers, that is critical of those who do not want to be criticized. Full of decisive sentences, it attacks the established as it defends the dignified. The author uses his daring audacity to engage with art, truth, humanism, and idealism; but to nothing else. Expressing deep emotions as it proposes contradictory opinions and bizarre theories, this book stands apart from the rest. A book that offends as it teaches, Fragmented Philosophy expresses controversial views and passionate opinions with a style that is as elegant as it is approachable. Offensive to some but helpful to most, this is, indeed, a unique self-help book.

### **Laodamia y Protesilao (Spanish)**

Play set in the classic Greece of the Heroic Age. It represents the fusion between Hellenism and Christianity, between mythology and theater, between non-conformism and love. It is a profound and systematic text that brings together unity and separation, feelings and reason, classicism and postmodernism.
